## HTMLEditier 2022

### What's New In?

Web and desktop HTML and XML editors are useful tools, but their extensive features may be beyond your needs. HTMLEditier is a feather-light text editor designed for creating, editing and producing standard HTML files. It's available through a minimalistic interface that contains just a couple of options. The simplicity of the application reminds us of Windows Notepad, but it comes with even fewer features. Requires .NET Framework to properly work. The downloaded pack consists of just one .exe. You can copy it to a preferred spot on the computer's hard drive or USB flash disk to effortlessly run HTMLEditier on any device. It doesn't integrate new records into the system registry or generate files on the HDD without your permission. On the other hand, you must have .NET Framework installed. As far as the GUI is concerned, the software utility is rather simple. It has a white background and default black text for writing HTML code, along with a menu bar with only four menus. Write code and save HTML files. HTML code can be typed or pasted from the Clipboard into the editing area while the text can be changed from black to red, green or blue. However, you should know that syntax highlighting isn't supported. There are also a couple of snippets available for inserting ready HTML headers, making text bold, and adding pictures. The HTML document can be saved to file by indicating the destination directory and file name as well as extension. Rudimentary tool for writing HTML code. HTMLEditier was barely noticeable concerning CPU and RAM consumption, which isn't surprising when considering its compact size. It stayed stable throughout its runtime and didn't freeze, crash or show errors. On the other hand, the program looks more like an unfinished software project than a reliable HTML editor. A lot more can be achieved by just sticking to the plain old Notepad. This tool has a long way to go, and it doesn't look like its development anymore. In comparison to: Kompozer HTML editor; Professional HTML Editor; eTextEditor A word processor for HTML and XML; WML Editor [Factors influencing the occurrence of clinical infections caused by microorganisms in the building environment in the operation theater of a general hospital]. In this paper we aimed to study the influence of the presence of operations and different clinical activities in the occurrence of clinical infections of the hospital environment in the operating theatre. A total of 265 specimens collected from different clinical activity points of the theatre environment of our hospital were analyzed. Specimens were collected from operating room surfaces with different activity (patient, physician, nurse, laboratory, cleaning staff) and from air spaces with different activity (floor, ceilings, cupola, operating window, shower, toilet).

---
